ANWENDUNGSFALL

JENNY AUS DEM CI TEAM

Ausgangssituation

Jenny arbeitet im Team Wettbewerbsbeobachtung, das zum Bereich Strategie Europa eines Anbieters für ICT gehört. Für den Strategieplan der nächsten 3 Jahre soll Jenny sich genauer den Markt und Hauptwettbewerber anschauen. Dabei liegt der Fokus u.a. auf Huawei mit dem Ziel, deren Aktivitäten im aktuellen geopolitischen Kontext genauer zu verstehen.

Aktuell prüft Jenny einmal pro Woche manuell die Webseite von Huawei auf Neuigkeiten und verteilt relevante Infos per Mail. Von Marketingkollegen erhält sie einmal im Monat einen Newsletter von einem externen Anbieter. In der Kaffeepause trifft sie manchmal Kollegen aus dem Vertrieb, die ihr spannendes Kundenfeedback mitteilen.

Um genauer ihren Fragestellungen nachzugehen, möchte Jenny ein eigenes Monitoring aufsetzen, Infos effizienter teilen und dabei aktiv Kollegen aus dem Vertrieb und F&E mit einbeziehen.

Was braucht Jenny?

- Abteilungsübergreifenden Ansatz
- Eine relevante Auswahl an Quellen mit glaubwürdigem Inhalt
- Kontinuierliche Themenbeobachtung, möglichst visuell aufbereitet
- Alerts und Newsletter, die leicht konfigurierbar und teilbar sind

Huawei Mate 30 Pro handsets coming t...
Created

Instead of just launching in the usual retailers, Huawei is asking customers to register their interest from today, before a limited number of handsets become available from a couple of retailers on November 21. Whereas previous Huawei phones could be found with carriers, in JB HiFi, and other retailers here and there, the Huawei Mate 30 Pro will not be found in any of those places. Sadly, it's because Huawei can't licence Google's apps and services anymore – due to that pesky trade embargo

U.S. export controls, if enforced, will disrupt Huawei's access to processor chips and other technology. Its smartphones would lose Google maps and other services, making it hard to compete.

To limit that impact, Ren has emphasized making Huawei a self-reliant technology creator. This year's research spending is due to rise 20% to $17 billion.

The company has released a smartphone operating system it says can replace Google's Android if necessary. It makes some of its own processor chips but needs U.S. suppliers for high-end products.

"They do things from scratch," said Peng. "I think this is the influence of the founder."

1. Huawei claims AI leadership with launch of Ascend 910 chip and MindSpore
http://telecoms.com/499303/huawei-claims-ai-leadership-with-launch-of-ascend-910-chip-and-mindspore-framework/
fri 23 aug 2019

"Everything is moving forward according to plan, from R&D to product launch," said Huawei Rotating Chairman Eric Xu.
This also marks a new stage in Huawei's AI strategy.
Huawei chucked around a few datapoints involving things like Teraflops, to support its claim that the Ascend 910 kicks AI ass.
It also consumes around 10% less power than Huawei had previously expected it to.
For obvious reasons anything Huawei announces these days features liberal references to the importance of security and privacy.

2. New phase in AI strategy in Huawei

Description

Huawei has delivered a reminder of its technical expertise by breaking the world record 5G speed for a single user smartphone.
Huawei says the speeds are only possible because of its C-Band Carrier Aggregation technology that binds multiple spectrum bands to deliver improvements to speed and capacity.
"[The test was] Based on C-band 200MHz IBW and 2CC Carrier Aggregation technologies which only Huawei products can support.
Such warnings have had limited impact in Europe, where Huawei is a major partner for many major operators.

Huawei has delivered a reminder of its technical expertise by breaking the world record 5G speed for a single user smartphone.

The Chinese network equipment manufacturer built a 3GPP compliant test network at a Turk Telecom facility in Istanbul to achieve speeds in excess of 2.92Gbps.

Although it's unlikely that commercial users will be able to access speeds any time soon, it does demonstrate the theoretical potential of 5G using commercial equipment. A Huawei Mate X smartphone was used, alongside a Turk Telecom 5G SIM card.

"We combined two 5G carriers and established a new world record by reaching speeds of above 2.92 Gbps in our live 5G test network," said Yusuf Kıraç, Türk Telekom's CTO. "We are also the first operator to experiment with the 5G New Radio Carrier Aggregation Technology (C-Band NR Carrier Aggregation), which doubles the 5G link speed. Türk Telekom will continue to lead the development of all new generation technologies that our country needs in the future, as we do today.

"We have reached unprecedented speeds thanks to this technology, which provides many benefits for users and operators. The high speed and large capacity targets promised by 5G technology have been achieved."

Mnuchin, Kushner to visit Israel during Middle East trip

Collecté

US officials also have lobbied strongly to persuade Delhi not to give a slice of India's coming 5G communications network to Chinese telecoms giant Huawei, a company Washington accuses of violating US sanctions on Iran and also deems a tool of electronic espionage by Beijing.

Huawei News Screening 26/10/2019 19:48

Telecom gear makers to feel the heat

Collecté

New Delhi: Telecom equipment makers such as Europe's Ericsson and Nokia, and China-based Huawei could be staring at a significant impact in India, with the Supreme Court's ruling on adjusted gross revenue likely to force their main clients, Vodafone Idea Ltd (VIL) and Bharti Airtel, to curtail capex plans, say analysts. Nokia and Ericsson will see the maximum impact in the mid-to-long term," Dhamija added.

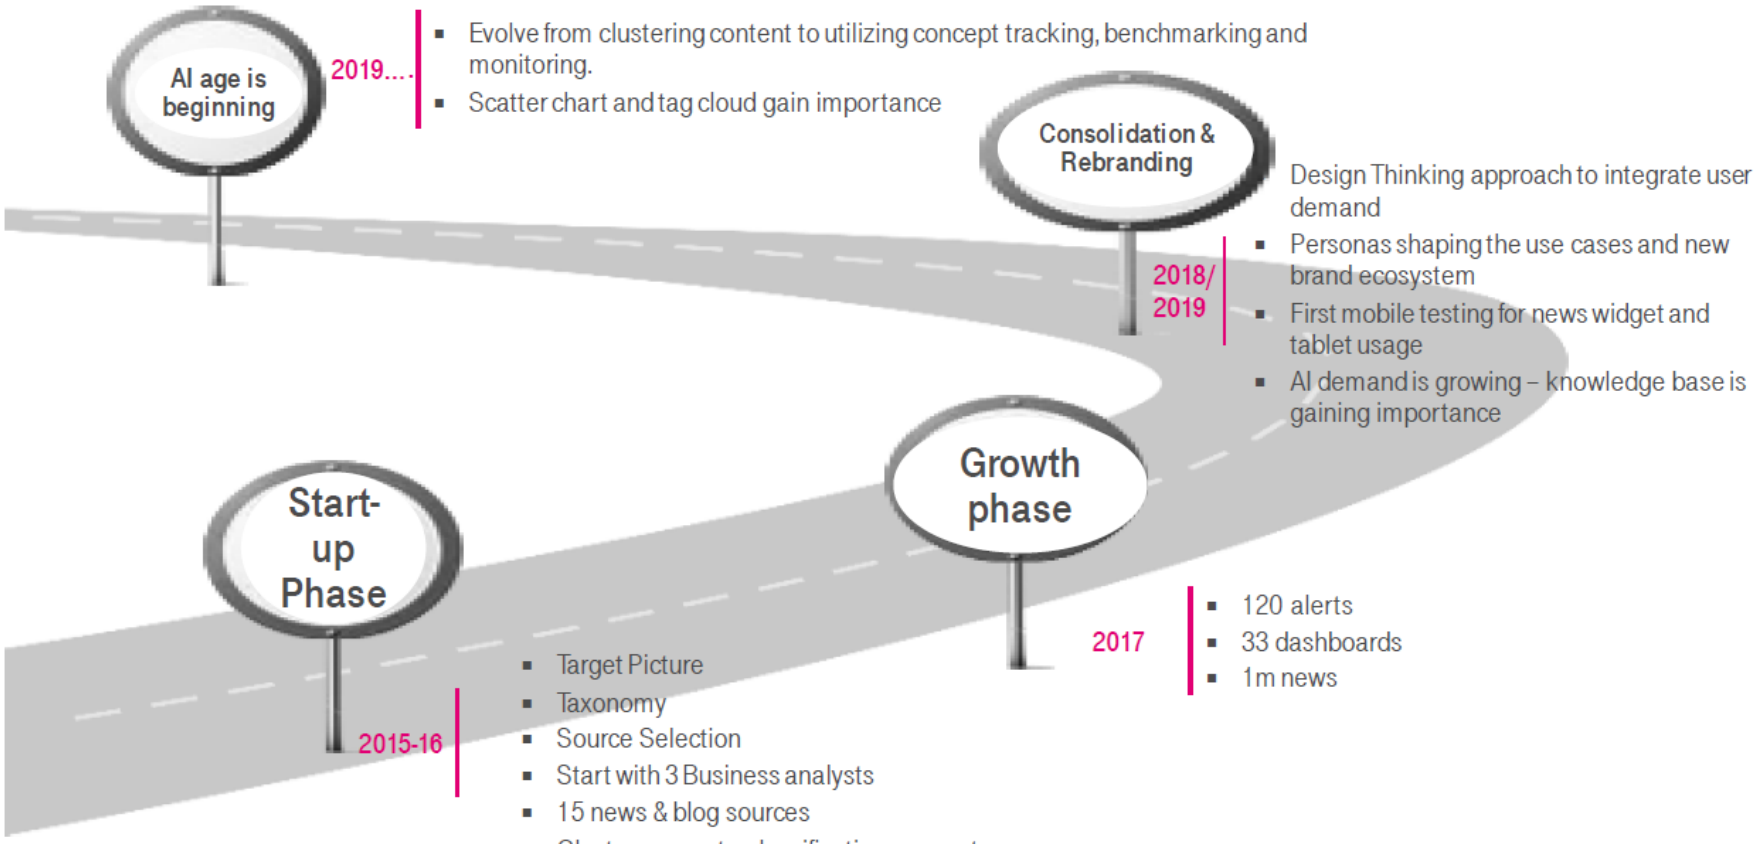
INTELLIGENCE HUB JOURNEY

DT INTELLIGENCEHUB



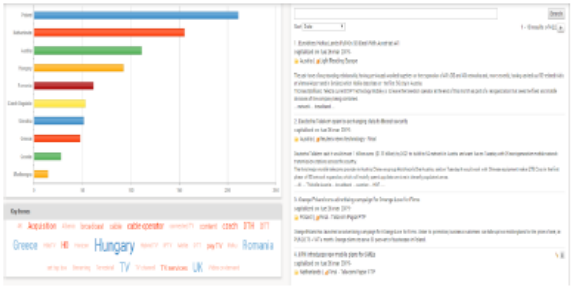
LIFE IS FOR SHARING.

CREATING VALUE FOR THE GROUP

DT INTELLIGENCEHUB

REDUCES TIME TO INSIGHT TO NEARLY REAL-TIME ACCESS TO INFO

- ✓ Topical dashboards compile content from different sources
- ✓ Reduces time to find relevant content by days
- ✓ Content analysis allows for concept tracking

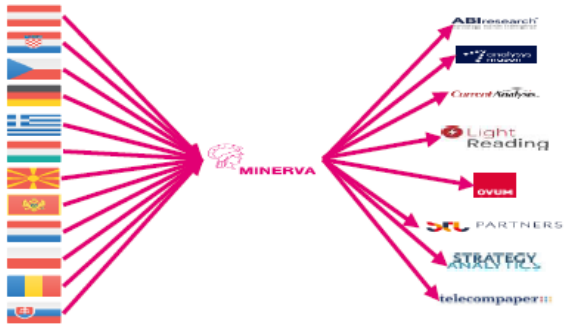


PROMOTES COOPERATION & COLLABORATION ACROSS BORDERS

- ✓ Share, recommend, comment on content...

SIMPLIFIES ACCESS – SINGLE SIGN ON TO MORE THAN 250 SOURCES

- ✓ Single sign on to all sources and databases



PROTECTS DT'S INVESTMENT FOR RESEARCH

- ✓ Protects against breach of license, as content only available via DT mail address
- ✓ Avoid analysts tracking usage of DT searches

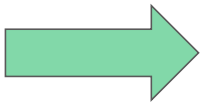
AI FEATURES WILL EVOLVE TO OPTIMIZE USAGE AND IMPROVE ANALYTICS

FAZIT & AUSBLICK

BEWÄLTIGUNG DER HERAUSFORDERUNGEN

Herausforderungen:

- Relevante Informationen finden
- „Connecting the dots“
- Trends erkennen und bewerten
- Collaboration
- Wahrgenommen werden
- Gewonnenes Wissen pflegen
- Welche Tools machen Sinn?



Tools können einen klaren Beitrag zur Bewältigung der Herausforderungen leisten.

+

- Geschäftskritische Use Cases
- Time to Insights als Messgröße
- Personas
- Promoten Sie Ihre Arbeit
- Unternehmenskultur berücksichtigen
- Tools sollten zu Use Cases passen und nicht andersherum
- Menschliches Fachwissen ist notwendig
